

ProTec course circle for new DIVERS.

To assure a high quality certification system, ProTec has standardized the registration process.

Each ProTec Instructor is advised, to show his/her trainer status card to his/her students on demand. The student might email to contact@protecdiver.com (specify trainer name and ID) asking for confirmation of the trainer status.

Right after course start, the student should register online at: www.protecdiver.com go> members (upper left corner) go> (Diver / dive student who attended a ProTec course) +++new Diver+++.

Input your data. Keep in mind that if your address is wrong or something is missing, the mail will fail and you won't get your cards. If a wrong address is provided, any re-sending is at the expense of the student.

Then upload a passport-like photo. If scanned, take care that you scanned only your photo and not any other empty space too. The photo has to be min. 20 KB to max. 100 KB size and the x-y ratio about 5:7 (i.e. Horizontal 100 pixel / Vertical 140 pixel). A photo which is suitable for a passport will be the best. The type has to be .JPG. You will see the result after upload online for checking. If successfully finished, you will receive a temporary ID (code). Copy this and keep it!

During or after the course, your Instructor needs your temporary ID for your certification record.

Your temp.ID will be kept for a while in our database, so if you attend another ProTec course later, you just use the same temp. ID, assumed all data is still the same. If your address has changed, go > +++Diver with ProTec-ID+++ and register again, providing also your original ProTec ID as on your ProTec dive card.

For our ProTec Course Quality Assurance we like to advise our divers and dive students that each ProTec. Instructor has to work with the ProTec course checklist - for each student. At the end of each course, this checklist has to be signed by the instructor and the student. A copy has to be given to the student, unasked. This ProTec Course Checklist contains useful information about the course highlights and the examination points. It confirms also the completion of the course standards.

Right after successful certification done by the Instructor, an automatic email with a pic of a temporary card will be sent to your email addr. This should fill the gap until your ProTec dive card arrive, which could take 1-2 weeks, depending on local mail-services..

If you have any more questions about your course, please contact your ProTec Instructor first. Thank you very much.
